Inside This Issue:

- Seminars and Meetings
- New Flying field
- Under the Microscope
- For sale Items

**“Always seek new pastures before the good grass
is cut out from under thy feet”**

New Year's Greetings to all our members new and old.

The year 2016 has begun with a flurry of activity by the new executive:

- A new field location is being checked out:
- The Field Procedures are being reviewed and updated in light of the proposed changes by Transport Canada for Model Aircraft and Unmanned Air Vehicles (UAV's);
- A series of winter Workshop/Seminars has been scheduled - the topics and subject matters will be announced shortly and will be based largely on members requests/needs for the building season. Some themes for seminars were suggested by members at our December membership meeting ... airframe covering, how to solder, how to exploit thermals once you find one, build a simple rubber freeflight ... we need one volunteer-organizer for each seminar.

Three good reasons for you to head out and attend the next Membership meeting

Sunday, January 10th at the **Rockton Library Hall starting at 1:30pm.**

For Sale

- **April 23rd** **Winter Seminar *, Rockton Library Hall** **11:00am**

* **Seminar topics to announced shortly. Bring you own lunch**

** The show occupies the entire two-floor Seagate conference centre. The top floor is all swap shops. The ground floor is manufacturer's exhibits, retail stores sales, and a display of many many beautiful model airplanes. It would be a great day if we had 2 or 3 carloads going. **Passports are needed for border crossing.**
